

School Environmental Health & Safety - Fall 2010 Workshop

Washington State Department of Health - School Environmental Health & Safety Program

Local health jurisdictions and school personnel (maintenance and operations staff, custodians, nurses, risk managers, teachers, and administrators) are invited to a **free** workshop designed to provide current information on school environmental health and safety issues. Topics will include infectious disease control and green cleaning, shop hazards, science lab and art studio chemical hazards, and more!

Register now for the workshop near you!
